

Standardise IT Across your business

Improve your employees level of satisfaction and productivity, with the latest technology, all at a lower cost.

What is Device-as-a-Service?

A Device-as-a-Service subscription standardises hardware, operating systems and services across your business, ensuring a non-fragmented IT estate, with reduced management complexity and support costs.

It spreads costs over the useful life of technology and services, into one simple plan

Device as a Service is more than a cost-effective way to manage technology; it's a strategic tool that empowers small businesses.

By reducing financial burdens, providing scalable solutions, offering access to the latest technology, and simplifying IT management, DaaS helps small businesses stay agile, innovative, and competitive.

By embracing DaaS, small business owners are not just investing in technology; they're investing in their business's future. With DaaS, the path to growth and success becomes clearer and less cluttered by financial and technological obstacles.

Benefits of Device-as-a-Service

Reduced cost of ownership

Save up to 30% of the total cost of ownership of hardware and software. Plus spread your VAT payment over the term and pay it on a smaller amount

Better Equipment

Keep yourself ahead of the game with the latest technology. Improve your employees level of satisfaction and productivity, all at a lower cost.

Manage your cash flow

Control your spend and spread the cost over the useful life of your technology and services.
